INFLOW CO.

Compressed Air Engineering Services

Independent • Vendor Neutral • 18 Years of Experience

Xcel Energy Energy Efficiency Partner Award winner, twelve consecutive years, 2015 to 2026

Maximum Uptime • Reliability • Performance

Highly experienced compressed air system management with sustainability and efficiency in mind

Our Comprehensive Services

Leak Detection
Ultrasonic leak detection technology to identify and quantify air loss

Data Monitoring & Collection
Real-time monitoring of flow, power, and pressure with advanced analytics

Data Reporting
Comprehensive reporting with actionable insights and performance metrics

System Design
Custom compressed air system engineering and optimization design

Supply Side Audit
Comprehensive evaluation of compressor room equipment and efficiency

Demand Side Audit
Analysis of air consumption patterns and end-use optimization

Energy Savings & Rebate Qualification
Project analysis and documentation for utility rebate programs

Baselining & Benchmarking
Establish performance metrics and track improvements over time

Why Choose Inflow Co.?

100% Independent
No vendor affiliations means unbiased recommendations in your best interest

Award Winning, 12 Years Running
Xcel Energy Energy Efficiency Partner Award every year since 2015; Compressed Air category 2025 and 2026

Sustainability Focused
Environmental stewardship through energy efficiency and reduced waste
